

iPhone App Development

CM420-09-2016-C

Lesson 1

Lecturer

Bryant Tang

bryant.tang14mo@gmail.com

FAQ

- What you have to bring in every class?

Macbook & your heart (on time, plz....)

- What activities in class?

Topic talk -> coding example -> exercise

- How to get the resource and material?

Use **Git** (<https://github.com/bryanttang/iOS-Class-2016-9>)

Calendar

Sun	Mon	Tue	Wed	Thu	Fri	Sat
18	19	20	21	22	23	24

Schedule

Class-1

19/09

- - - -

- Introduction
- Xcode
- Your first Project

Class-2

22/09

- - - -

- Objective-C
- Storyboard
- Control an UI

Class-3

26/09

- - - -

- UIView, UIViewController
- Gesture
- Animation

Class-4

29/09

- - - -

- UI Constraint
- Picker View

03/10

Holiday

Class-5

6/10

- - - -

- UITableViewController
- Custom Cell

Schedule

10/10

Holiday

Class-6

13/10

- Navigation Controller
- Tab bar Controller

Class-7

17/10

- MapKit
- Third Party Resource
- Core Location
- UIAlertView

Class-8

20/10

- Network Data (JSON, Image)*
- Concurrent Programming
- Plist

Class-9

24/10

- NSTimer
- AVAudioPlayer
- Swift

Class-10

27/10

- Distribute your app
- **Final exam and Demo**

Grade

How to get the Certificate?

+

Summary

- Develop in iOS
- Development environment
- Objective-c Part 1

Benefits of iOS development

- Devices amount are limited
- Friendly development environment
- Simple app distribution channel
- Review process acts as a quality guard
- The OS is designed to work very great in mobile.

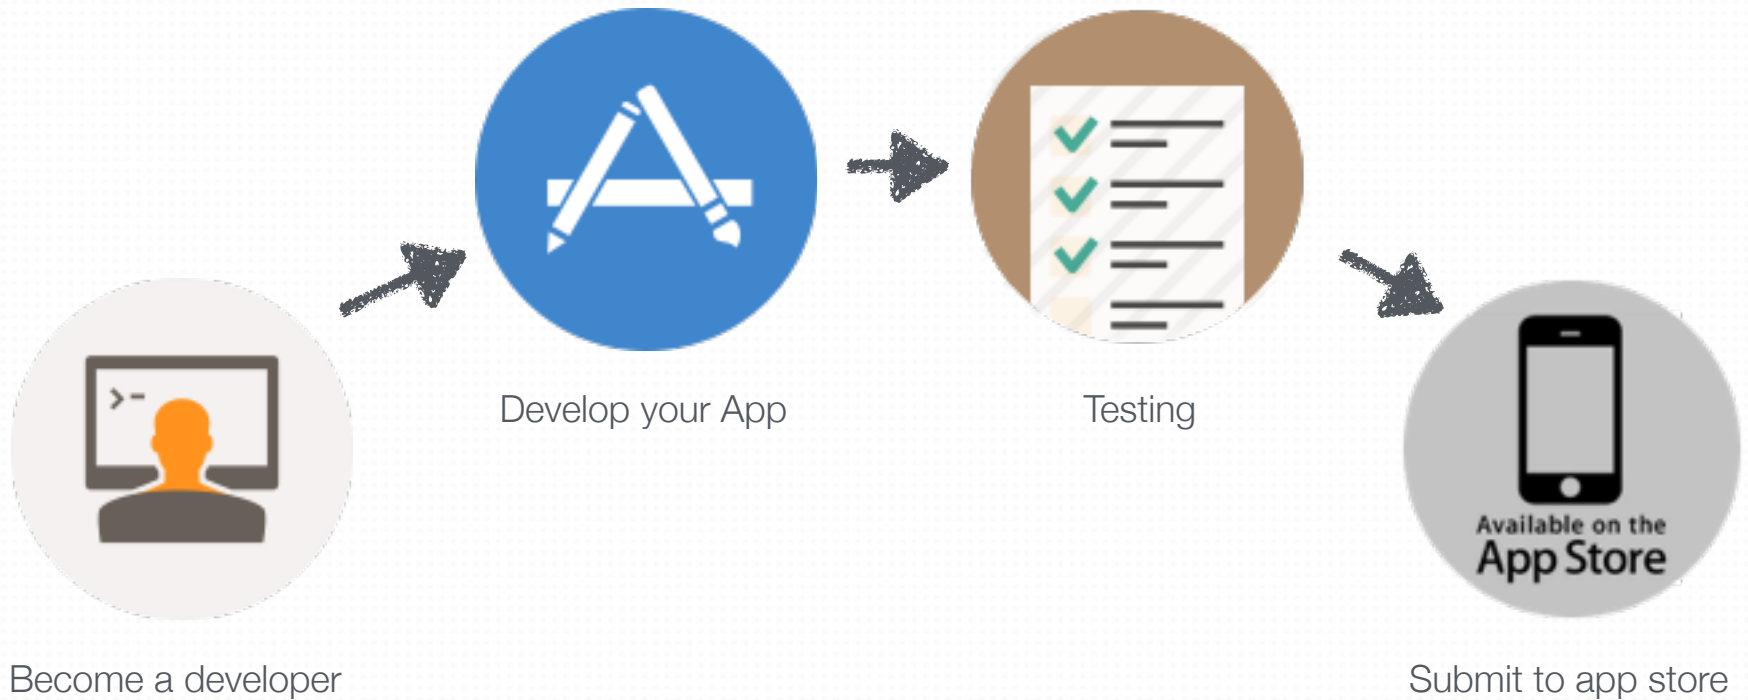

Weakness of iOS development

- Long waiting time for first submit
- Reviewing process take time
- More constrain(secure) for developing apps than other platform (Android)

We are going to learn...

- How to code by using Objective-C
- How to use storyboard to build an app
- How to use different user interface components in iOS.
- How to build apps and submit to App Store.

How do I have a app?

Easy to become a iOS Developer

- Sign in an Apple account
- Enroll a program

iOS

iOS Developer Program Individual \$99 / Year

For an individual developer who will be creating free and commercial iOS apps for distribution on the App Store.

iOS Developer Program Company \$99 / Year

For a company with a development team who will be creating free and commercial iOS apps for distribution on the App Store.

iOS Developer Enterprise Program \$299 / Year

For a company who will be creating proprietary, in-house iOS apps.

Note: A Dun & Bradstreet Number is required.

iOS Developer University Program Free

For higher education institutions looking to introduce iOS development into their curriculum.

iOS Platform

iOS Version

							
Version	iPhone OS 2	iPhone OS 3	iOS 4	iOS 5	iOS 6	iOS 7	
Codename	Big Bear	Kirkwood	Apex	Telluride	Sundance	Innsbruck

When viewed using the iTunes U app for iOS, this course may include enhanced materials such as instructor notes and assignments.

Developing iOS 9 Apps with Swift

Paul Hegarty

[Details](#) [Ratings and Reviews](#) [Related](#)

Description

Updated for iOS 9 and Swift. Tools and APIs required to build applications for the iPhone and iPad platforms using the iOS SDK. User interface design for mobile devices and unique user interactions using multi-touch technologies. Object-oriented design using model-view-controller paradigm, memory management, Swift programming language. Other topics include: animation, mobile device power management, multi-threading, networking and performance considerations.

[more](#)

Course Outline

- I. Introduction to iOS, Xcode 7, and Swift
- II. Using MVC in iOS
- III. Swift and the Foundation Framework
- IV. Views and Gestures
- V. Core Data

Xcode

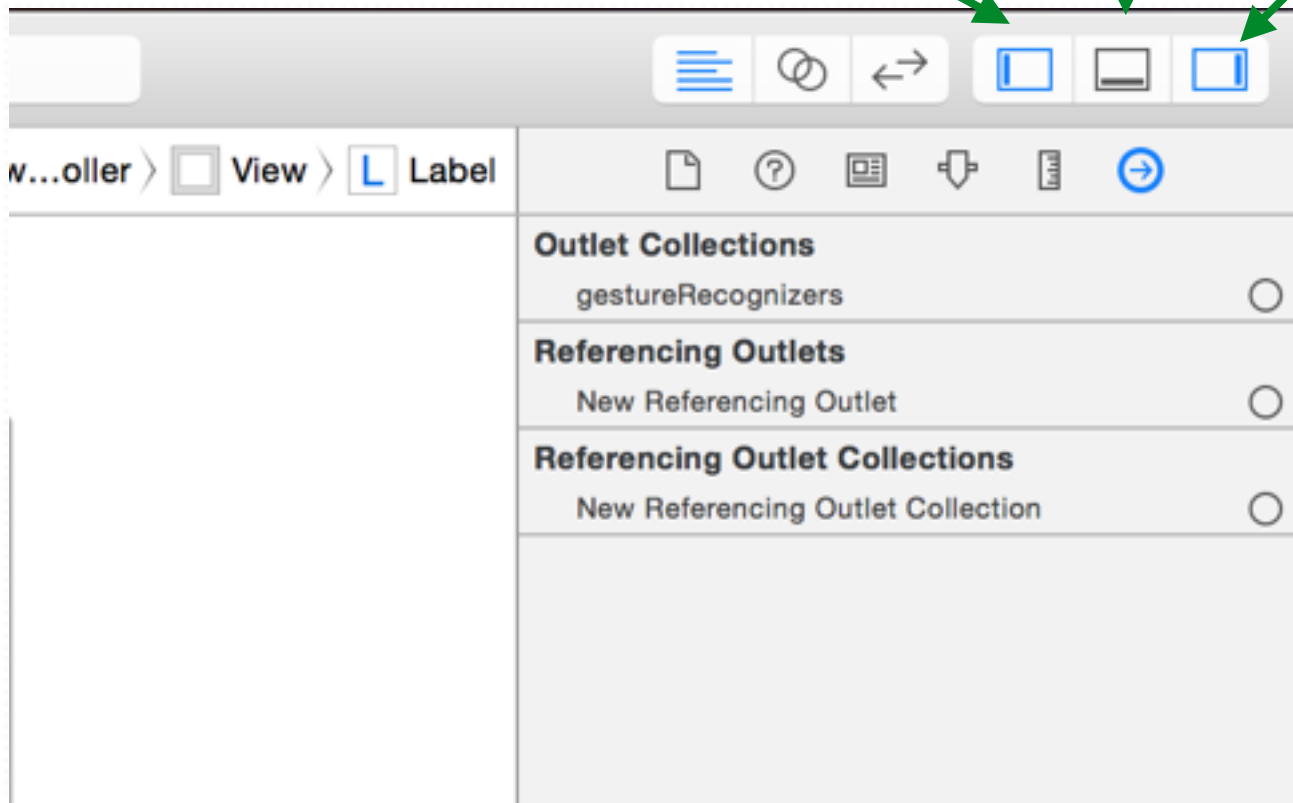

Xcode

Storyboard

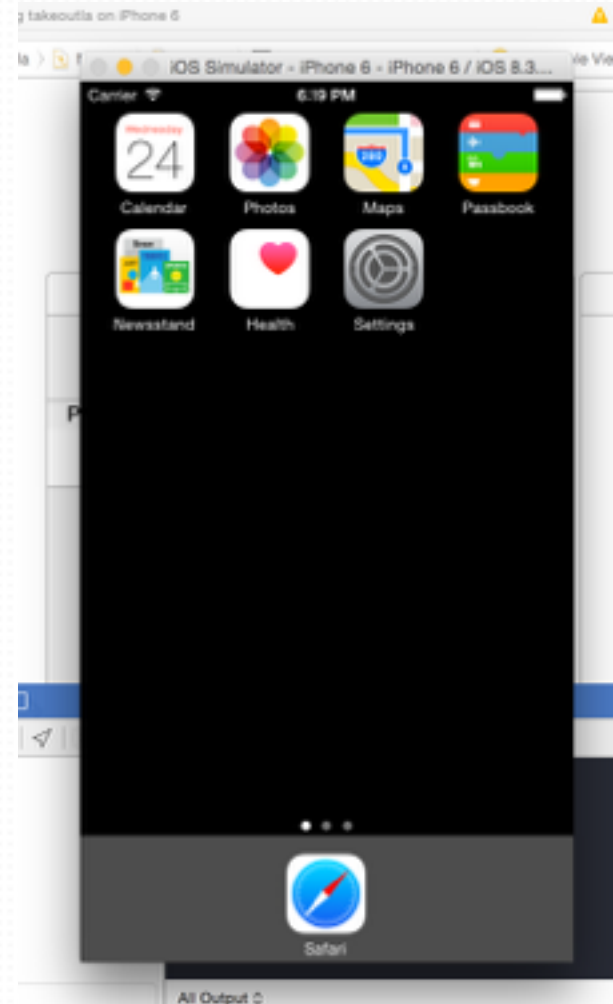

How to run a project?

Press the run button,
then the simulator will appear

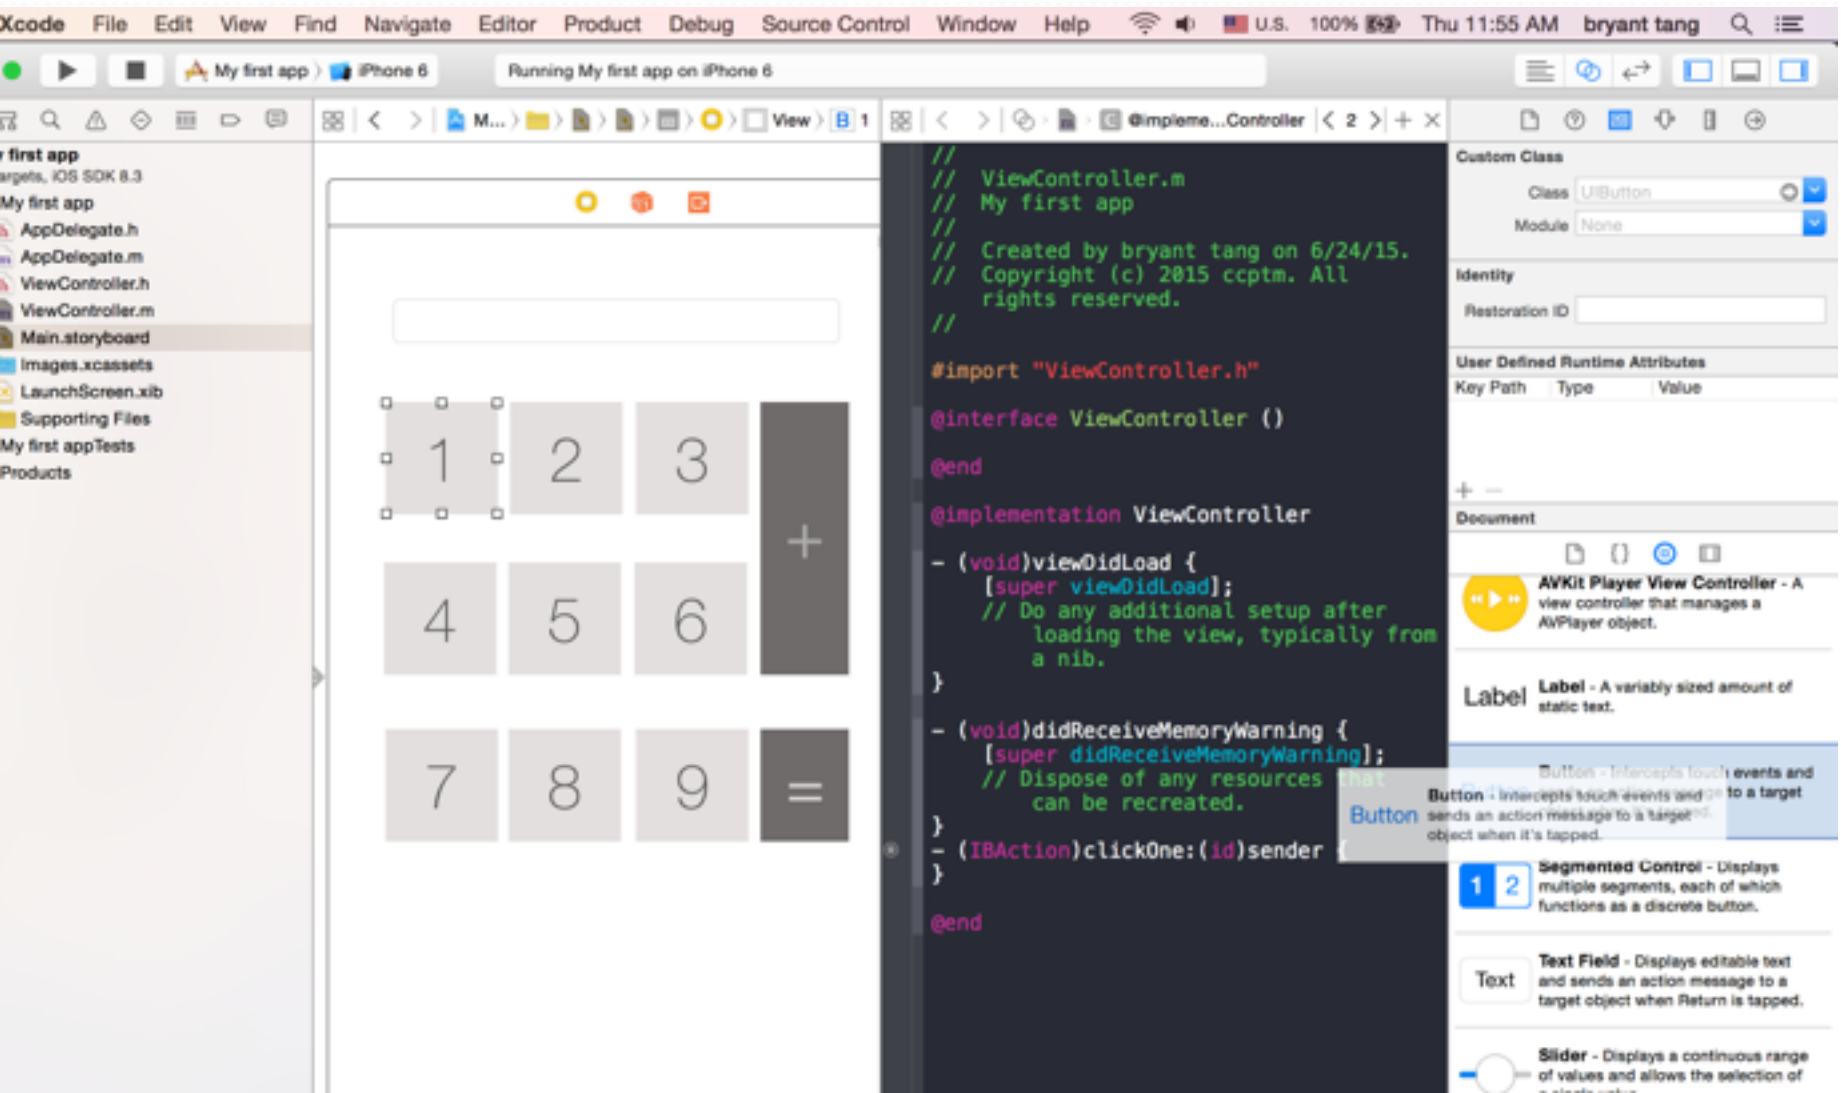

Run button

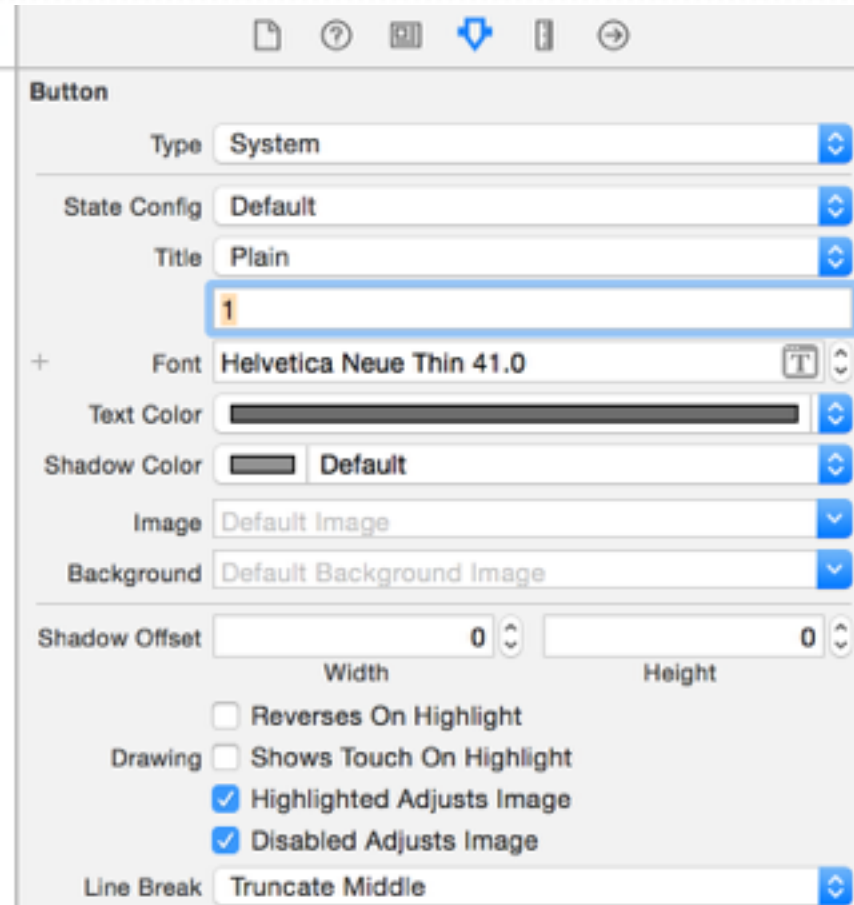

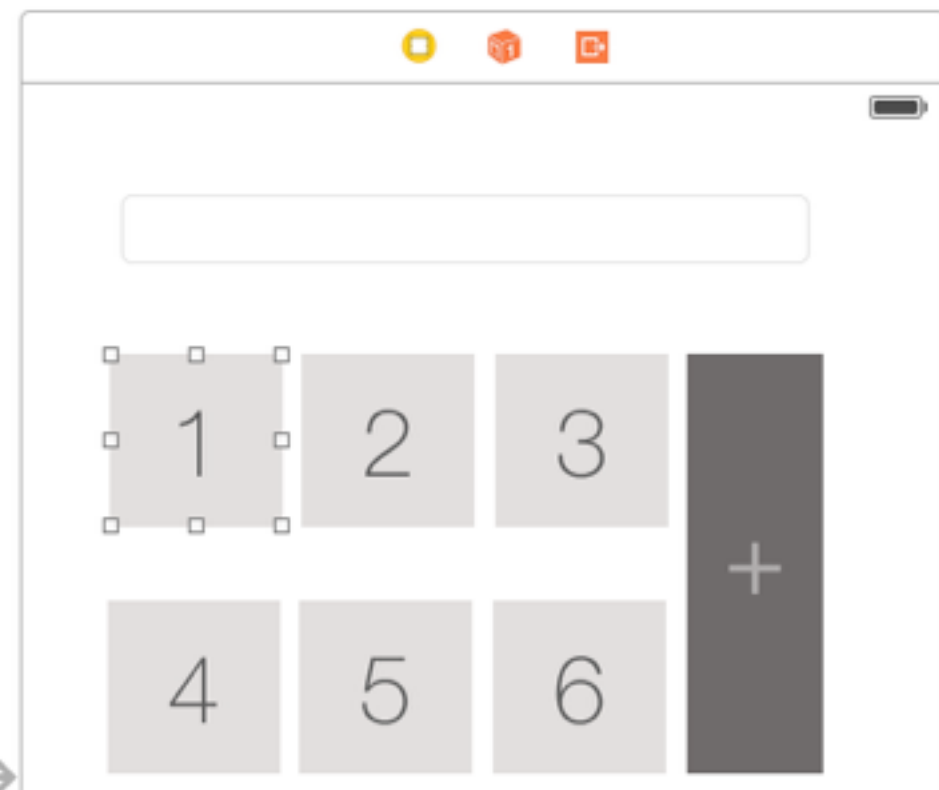

Calculator

Add elements on storyboard

Edit properties of element

My...pp > Ma...rd > M...ase) > Vie...ne > Vie...ller > View > B 1

Action Connection - storyboard vs code

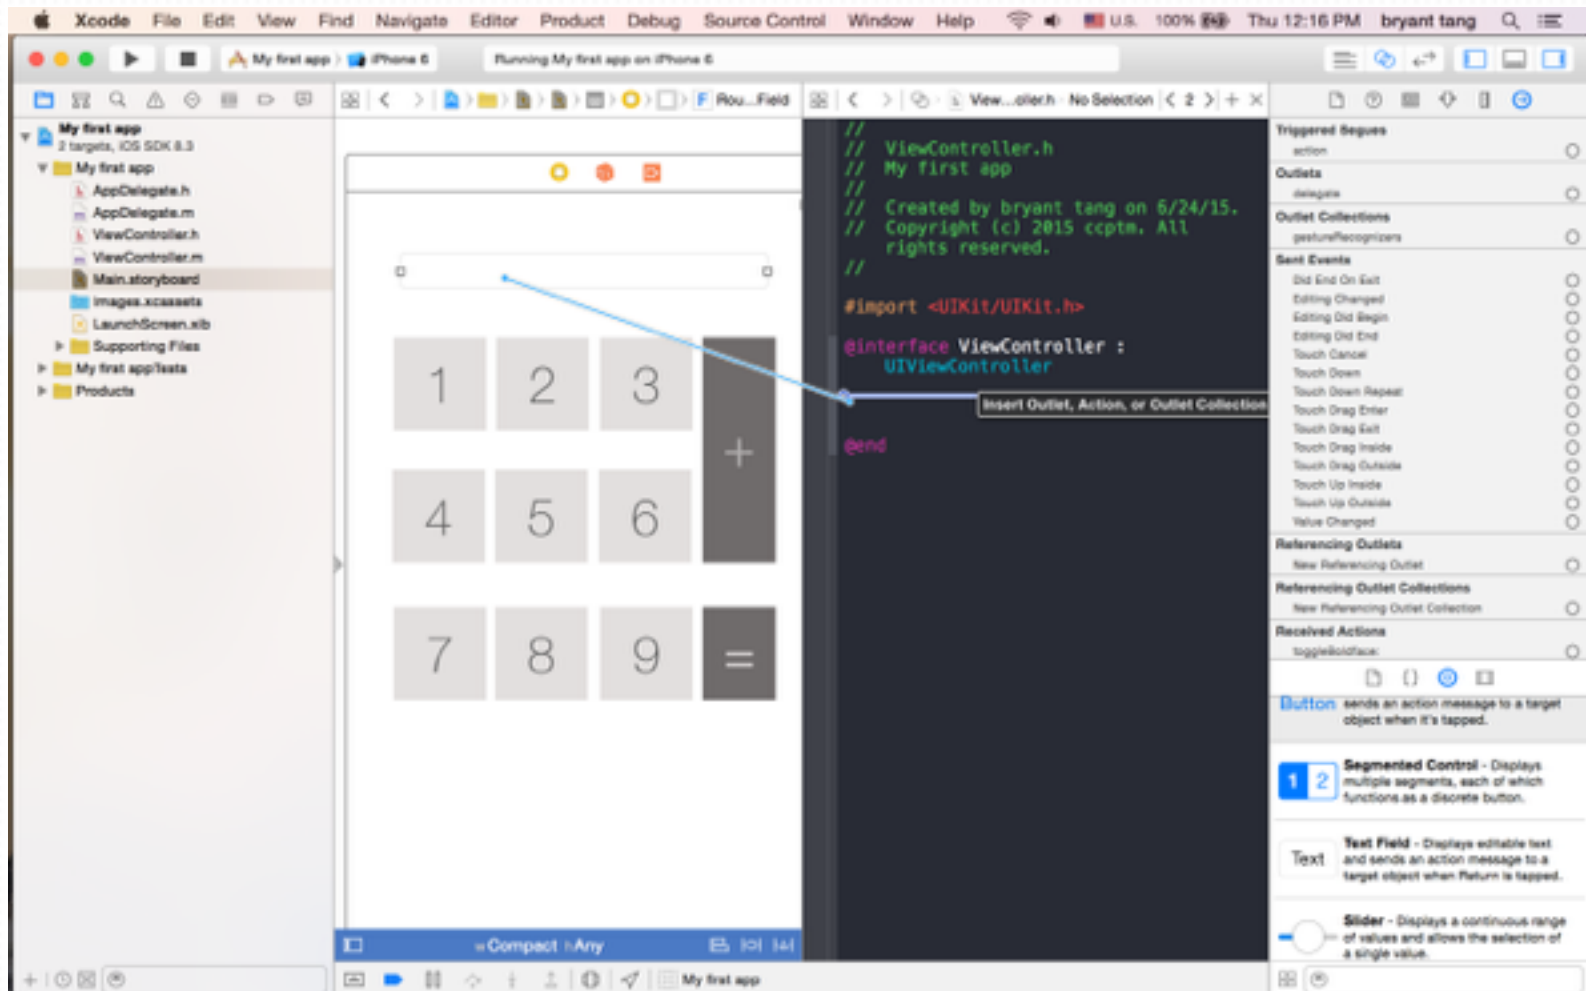

- **Storyboard** - layout design and work flow
- **Program** (.h or .m) - Control the element
- Connect - Storyboard and .m file

Use  to view both storyboard and program
Press "control", hold and drag from the element

Element Connection

- Connect - Storyboard and .h file

Objective-C Basic Coding

display one when press '1'

```
- (IBAction)clickOne:(id)sender {  
    //Show 1 on textfield  
    _display.text = [_display.text stringByAppendingString:@"1"];  
}
```

Press '+' - save the input and clean display

```
- (IBAction)clickPlus:(id)sender {  
    store = store + [_display.text intValue];  
    _display.text = @"";  
}
```

Press '=' - Add two input and show on display

```
- (IBAction)clickEqual:(id)sender {  
    result = store + [_display.text intValue];  
    _display.text = [NSString stringWithFormat:@"%d", result];  
    store = 0;  
}
```

Objective-C Basic Coding

Run your app by press 'command + r' or

Practice

Browse the App Store. Find some apps that impress you. Discuss why they are good.

Improve your first app by adding a 'Reset' button or adding another functions like '-' or 'x'
